DIRECTOR'S WELCOME

Well, hello there!

Welcome to the final Revue of 2016! Hope you liked the others. Thank you so much for buying a ticket to our show! Now that you're actually here, in the theatre, I can drop the marketing bullshit and give it to you straight.

This show? **It's the best we've ever made.**

It's the biggest theatre, the most talented cast, and by far the most expensive show we've ever produced. And it has to be; for the first time ever, we're following Law and Med, our partners in crime and rivals in comedy. So we've brought our best game, and we can't wait for you to see it.

I'd like to thank the massive team behind this show, but don't have the words to do it. They've put their heart and soul into this production, and it shows. It couldn't have possibly happened without them.

But enough mushy stuff. Get ready to laugh, groan, clap, and laugh, because you're about to watch a few hours of hilarious performance.

Avengineers, assemble!

Duncan Bakke

Executive Director

PRODUCER'S WELCOME

How does a rag-tag, volunteer, 80-odd, student lead endeavour

Somehow become even bigger and better

How do Engineers create the best show ever,

To grace the hallowed stage of Skycity Theatre?

That's a good question! And a bold claim, but you're about to see said show, so in a few hours you can decide for yourself how it stacks up! Right off the bat though – thank you so much for coming to see the show. The countless hours of rehearsals are all worth it when we get to perform for all of you.

The Engineering Revue has grown up a lot this year! We've moved Theatres to the gorgeous space you're currently sitting in, which has been both incredibly exciting and daunting. For the first time we're also performing at the same time as two other Revues. Who would have thought! It's been a hell of a Revue season, but you know, always save the best till last! Through all of this our incredible cast has worked

tirelessly. Massive props goes to them for their energy, patience, creative spirit and team attitude. So all of you – give yourselves a pat on the back, it has been an absolute pleasure bombarding you with emails this year.

And behind the scenes, the Exec team who work the equivalent of a full time job – each – to put this show together. It's been a learning curve and a half but we pulled it off, we're here!

And of course, we'd like to thank our sponsors for funding our shenanigans – your support means the world. Despite the stress this production creates in our lives, I don't think any of us would give it up. Thank you for letting us do what we love.

Right! The show is probably about to start! Stop reading, look up, and enjoy!

Rachel Love

Producer

Find out how Engineers can make
a difference at teachfirstnz.org

Applications for the Teach First graduate
programme close on August 15th.

We value creativity...

Explore your Future

As an Engineer we know you look for exciting challenges. You want a friendly, passionate team that values your ideas and an end product that you can leave your stamp on.

Through unrivalled commitment to innovation; to doing the right thing; and doing what is best for the patient, we continue to inspire world-leading healthcare solutions.

Make a difference with us

Applications for our dedicated graduate and intern programmes open soon. Our tailored approach will expose you to multiple facets of the business giving you the skills and support to develop your career as an engineer.

Opportunities are available in the following Engineering, Science or Technology disciplines:

- Mechanical
- Electrical/Electronics
- Software
- Mechatronics
- Product Development
- Biomedical/Bioengineering
- Physics
- Polymer Chemistry
